

# WET CHEMICAL FOR COOKING APPLIANCES

| SPECIFICATIONS  | WET CHEMICAL                          |
|---|---------------------------------------|
| <b>100 PSI/690 kPa OPERATING PRESSURE</b>             |                                       |
| Part Number   | 50006                                 |
| Application   | Hose and Wand                         |
| Model Number  | WC-6 Liter                            |
| U/L Rating  | K                                     |
| Capacity (liters/gal.)                                | 6/1.59                                |
| Shipping Weight (lbs./kg)                             | 17 • 7.7                              |
| Extinguisher Height (in./cm)                          | 19 <sup>1</sup> / <sub>4</sub> • 48.9 |
| Height with Hose and Wand Installed in Clips (in./cm) | 25 <sup>1</sup> / <sub>2</sub> • 64.8 |
| Width with Hose and Wand Installed in Clips (in./cm)  | 11 • 27.9                             |
| Cylinder Diameter (in./cm)                            | 7 • 17.8                              |
| Discharge Time (seconds)                              | 54                                    |
| Standard Bracket                                      | Wall                                  |
| Cylinder  |                                       |
| Temperature Range                                     | +40°F to +120°F                       |
| USCG Approved   | No                                    |

**WET CHEMICAL** Extinguishers contain a blend of Potassium Acetate and Citrate that is extremely effective in combating fires in today's cooking appliances that use unsaturated cooking oils. This chemical excels in effectively fighting and cooling these very hot and difficult fires. The application of the agent using the extension wand provides a fine mist spray that prevents splashing of the grease and confines it to the cooking surface.

### Manufactured to ANSI/UL 8 and ANSI/UL 711 Standards

Designed to work in conjunction with pre-engineered hood systems. Tested to extinguish one 18" x 24" fat fryer.
